Lightweight, Comfortable, Configurable Buttons, Two-Way Communications

Protecting Patients from harm:

Fully networked system that provides real-time visibility of Patients and also supports Asset Tracking and Staff Duress

Wandering and disoriented patients can come to harm if they go astray, but limiting their freedom can cause unnecessary stress and anxiety in addition to loss of dignity. The AllGuard™ Wandering Patient Protection System gives patients freedom while you keep a virtual eye on them – making sure they don't get into harm's way in a gentle and respectful manner. AllGuard™ actively monitors and instantly notifies you of any alerts and alarms triggered by the AllGuard™ tags as a result of an impending risk.

Advantages

- Instant Detection of Tagged Patients at Exit Doors to enable Alarms, and to Secure the Doors based on tag rules.
- Initiate local and remote audio/visual alarms using sounders, strobes, emails and paged messages.
- Choice of the smallest and Lightest Patient Tags in the market, including Tamper Detecting Tags.
- Capability for Location and Tracking means Visibility of High Risk Patients in real-time.

Smallest and Lightest Tags including a patented Tamper Detecting tag

Protect only your Perimeter or add Tracking and Location for full coverage

Add Asset Tracking, Location and Security as well as Staff Duress functionality

Enterprise-class server supports Centralized Monitoring of disparate locations

Video Surveillance integration provides live view of event site saving staff time

The AllGuard™ Wandering Patient Protection is fully IP-based and in full compliance with today's corporate IT policies. Based on 433MHz Active RFID, it delivers higher performance, lower maintenance burden and high reliability compared to other systems that are prone to RF noise and can interfere with system operation. Whether implemented as a Perimeter Security system, or as a full-featured Tracking, Location and Security system, AllGuard™ technology delivers unparalleled safety for your patients.
