AllGuard Yard Management

Active RFID that Delivers
real-time visibility for

Effective Control

AllGuard™

Track, Locate and Secure Yard and Warehouse Assets and Personnel

Yard Management

Delivers Real-time Visibility, Location, and Advanced Security for your Inventory

ToughTag™

Industrial Applications with the World's toughest active RFID tag

AllGuard Delivers Instant ROI:

Real-time Inventory, Asset Location, and Advanced Loss Prevention Improve Efficiency and Reduce Shrinkage

GuardRFID's 433MHz Active RFID technology delivers efficiency gains and cost reduction for companies and solution providers managing yard inventory. AllGuard for Yard Management comprises the ToughTag, the world's toughest Active RFID tag, environmentally-hardened RFID infrastructure, and the world's most robust communication protocols and location algorithms to provide real-time information to elevate Yard Management to the next level in efficiency and security. AllGuard can be integrated with your proprietary yard management software or implemented using GuardRFID client software.

Detect inventory over greater range without "choking" on large numbers of tags

Reduce expensive and time-consuming manual inventory management

Optimize order picking efficiency and inventory placement

Prevent loss or theft with advanced perimeter security and motion sensing

Enable strategic inventory optimization throughout your yard/warehouse network

AllGuard is completely IP-based and fully compliant with today's corporate IT policies and standards, so implementation in one facility or throughout your supply chain is easy and highly-scalable. Whether implemented stand-alone for Yard Management or as one component of a complete GuardRFID Asset and Personnel Tracking and Security solution, AllGuard delivers immediate and measurable reduction in logistics costs and inventory shrinkage.

Contact WAPS to find out how you can use Active RFID technology to fast-track your way to a positive ROI.

Advantages

- Eliminate time-consuming inventory counts and costly errors with positive, real-time inventory visibility.
- Improve efficiency and reduce costs associated with searching for inventory with real-time location.
- Implement advanced Loss Prevention, including time-scheduled motion alarm detection, for all assets or each individually.
- Initiate security responses for multiple sites from a central monitoring location.
- Enable real-time Inventory Optimization enterprise-wide.
