SafeGuard™
Employee Safety with Duress Alarms, Real-time Tracking, Man Down Detection

Staff Tag™
Lightweight, Comfortable, Configurable Buttons, Two-Way Communications

A New Level of Employee Safety:

Superior Communication Technology, Accurate Real-time Location and Tracking, and Comfortable Personal Devices

GuardRFID's AllGuard platform delivers the most advanced Staff Duress and Lone Worker Safety available to your employees. It comprises a 433MHz Active RFID sensing and locating network field-proven for critical security applications, a compact, lightweight personal device, and the world's most robust communication protocols and location algorithms to elevate Staff Safety to a new level in performance and security. AllGuard can be integrated with your proprietary staff safety software or implemented using the GuardRFID SafeGuard Staff Duress client software.

ID-badge style personal devices ensure user comfort and system adoption

Reduce risk of missed alarms associated with infrared communication

Eliminate critical delays caused by ambiguous location information

Automatically track a employee in case they are still moving after an alarm

Enable centralized monitoring and unified, enterprise-wide personnel safety

AllGuard is 100% IP-based and in full compliance with today's corporate IT policies, so implementation in one facility or throughout your enterprise is easy and highly-scalable. Whether implemented as a stand-alone Personnel Safety system, or as part of a complete GuardRFID Asset and Personnel Tracking and Security Solution, AllGuard technology delivers unparalleled safety to your staff.

Contact WAPS to find out how you can use Active RFID technology to elevate your employees' safety to the next level.

Advantages

- Comfortable and lightweight badge-style personnel devices.

- Advanced radio-frequency communication minimizes risk of missed alarms caused by physical obstructions.

- Locate the security event and track a moving employee with typical accuracy of 2-4 meters (6-12 feet).

- Programmable Man Down Alarm capability ensures system delivers high level of safety and security.

- Enterprise capability enables centralized monitoring and allows employees to transfer between multiple facilities.
